

JOHN DOE

PERSONAL DETAILS

Data Scientist

Data Scientist with 4+ years in Python, R, statistics, machine learning, and deep learning, supporting remote interviews and candidate evaluation. Experienced in regression, classification, clustering, and privacy-aware assessment for technical screening.

Address: Austin, Texas, USA

Phone: +1 512 555 7812

E-Mail: john.doe.analytics@gmail.com

PROFESSIONAL EXPERIENCE

05/2024 – Present
Austin, Texas, USA

Business Intelligence Analyst

Horizon Technologies Inc.

- Conducted remote AEM Developer interviews using Python and R scorecards, evaluating 18 candidates across statistics, probability, and ML fundamentals.
- Built SQL-backed interview rubrics and classification checks, improving calibration consistency across 12 interviewer sessions and reducing review rework by 8%.
- Standardized confidentiality workflows in Python dashboards, securing candidate notes for 2K records and enabling flexible part-time screening coverage.

08/2023 – 04/2024
Dallas, Texas, USA

Graduate Data Analyst

Northbridge Research Institute

- Analyzed machine learning responses in R and Python, benchmarking 15K interview observations against statistics and probability criteria for candidate ranking.
- Applied regression and clustering models to assess technical depth, shortening evaluation turnaround by 6% while preserving privacy controls.

06/2021 – 07/2023
Chicago, Illinois, USA

Data Analyst

Sterling Consulting Group

- Designed remote interview guides in SQL and Python for statistics, deep learning, and transformers, covering 22 client requisitions.
- Automated classification-based candidate summaries, reducing manual note synthesis by 12% and improving interviewer handoff quality across 4K records.
- Validated CNN and RNN answers through structured assessments, increasing technical issue detection by 9% during screening interviews.

01/2021 – 05/2021
Phoenix, Arizona, USA

Data Engineering Intern

BluePeak Analytics

- Built Python data pipelines and probability checks for internship interview datasets, improving analysis speed by 5% over 2K records.

EDUCATION

09/2022 – Present

Master of Science (Business Analytics)

University of Texas at Dallas

Graduate Merit Scholarship Recipient, GPA: 3.8/4.0

Focus: Business Analytics

08/2017 – 05/2021

Bachelor of Science (Computer Engineering)

Arizona State University

GPA: 3.7/4.0

Focus: Software engineering, databases, statistics

SKILLS

Technical Skills: Python, R, Statistics, Probability, Machine Learning, Regression, Classification, Clustering, Deep Learning, Transformers

Tech Stack: Python, R, SQL, ML scoring, Remote interviews, Data privacy

Soft Skills: Confidentiality, Data privacy, Time flexibility, Remote collaboration, Structured communication

PROJECTS

- **Remote Interview Scoring Model:** Created a Python and SQL scoring model for candidate interviews, improving rubric consistency by 7% across 3K evaluations.
- **Privacy-Aware Screening Dashboard:** Built an R dashboard for confidential interview tracking, reducing manual reporting effort by 5% for remote assessors.

CERTIFICATIONS

Google Advanced Data Analytics Certificate, Microsoft Power BI Data Analyst Associate, AWS Certified Data Analytics Specialty

MISCELLANEOUS

Languages: Fluent English, Conversational Spanish

Hobbies: I love to host trivia nights. I also enjoy hiking, playing chess, and soccer.
